# Quick Reference Guide

▶▶ For IP & Digital  
Station Users

**IWATSU**<sup>®</sup>

**ADIX**  
APPS

# INTRODUCTION

This guide describes basic features and operations for Iwatsu telephones. This includes IP and Digital Multiline Telephones and the MKT Digital Key Telephone.

Certain features are not available on all Iwatsu models. For more information, refer to your Iwatsu Owner's Manual or contact your authorized ICON Voice Networks Dealer.

Only Iwatsu qualified personnel are authorized to install any component of an Iwatsu system. Should you require service, please contact your authorized ICON Voice Networks Dealer.

**Multipurpose Keys** - These keys can be programmed for specific functions, including outside line access, individual extension selection, and one-touch feature operation.

**Key Lamps** - These lamps light up or flash when someone is using the line or feature corresponding to that key. A green lamp indicates that you are using that line/feature. A red lamp indicates that someone else is using that line/feature.

**SPKR (Speaker)** - This key allows you to dial and receive outside or internal calls and talk without lifting the receiver.

**TRAN (Transfer)** - This key allows you to transfer a call from your phone to another extension.

**FEAT (Feature)** - This key is used to access many Iwatsu features.

**Note:** *The Echo Cancellation DSP technology used in the IX-12KTD/S-3 speakerphone was developed by NTT.*

**HOLD/DND (Hold/Do Not Disturb)** - This key is used to put a call on Hold or to set the Do Not Disturb function and prevent calls from ringing at your extension.

**Note:** See *Hold/Quick Forward* on page 11.

**Handset Volume Control** - The handset volume control key allows you to adjust the handset volume to one of three levels. Pressing the key will toggle between the three volume levels.

**Speaker Volume Control** - The speaker volume control key allows you to adjust the volume control of the speaker when using the speakerphone. Pressing the **[+]** key raises the volume to one of nine settings. Pressing the **[-]** will decrease the volume.

**Ringer Volume Control** - Pressing the ringer volume control key allows you to adjust the ringer volume to one of four levels.

**[Mute] Key** - When talking using the handset, press **[Mute]** to mute the handset transmitter. If using the speakerphone, press **[Mute]** to mute the station microphone. When using the headset jack, the **[Mute]** key mutes the transmitter on the headset.

**ICM** - The intercom system is the internal network used to communicate between the telephone extensions in your Iwatsu system. Pressing the **[ICM]** key connects you to an intercom line for conversation with other extensions.

## BASIC FEATURES

### Making an Outgoing Call

- Lift the receiver.
- Press an outside line key. You will hear a dial tone.
- Dial telephone number.

#### ***Make a dialing mistake?***

- Press the **[FLASH]** key to get new dial tone.
- Dial again.

### Receiving an Incoming Call

When your phone rings and lamp flashes:

- Lift the receiver to connect the call.

#### ***If your phone does not connect you to the call automatically***

When your phone rings and lamp flashes:

- Lift the receiver.
- Press the key with the flashing lamp to connect the call.

## Making an Intercom Call

- Lift the receiver and wait for dial tone.
- Dial an extension number.

*or*

If your phone has a **[DIRECT STATION SELECTION]** key assigned for the extension:

- Lift the receiver and wait for dial tone.
- Press the assigned extension key.

## Receiving a Call From Another Extension

When you hear the intercom call signal - either the caller's voice or intercom ringing tone.

- Pick up the receiver, and the call is connected.

*or*

- Speak into the microphone without lifting the receiver.

## Making an Intercom Group Call

- Dial the Intercom Group access number when you hear the Intercom Dial Tone.

## Putting a Call On Hold

When speaking on an outside line:

- Press the **[HOLD/DND]** key.
- The active outside line key lamp flashes green on your phone and red at other extensions.
- If the call is not picked up, the call will ring again at your phone.

## Picking Up a Call On Hold

- Press the key with either the green or the red flashing lamp to pick up the call being held on that line.

## Transferring a Call to Another Extension

When speaking on an outside line:

- Press the **[TRAN]** key. You will hear dial tone.
- Dial an extension number.

*or*

- Press an extension key (if assigned).
- Announce the call when the extension answers.
- Hang up.

## Full / Half-Duplex Toggle

You can toggle from half to full-duplex speakerphone modes:

- Lift receiver.
  - Press **[Speaker Duplex]**.
- or*
- Press **[FEAT]** key and dial **6+6** (Full-Duplex).
  - Press **[FEAT]** key and dial **0+6+6** (Half-Duplex).

## 911 Support

At default, your Iwatsu system is programmed to automatically contact your local Public Safety Answering Point (PSAP) when 911 is dialed. Enhanced 911 Service ensures that when 911 is dialed from a system extension, information that allows the PSAP to identify the caller's location in a building is sent to the PSAP along with the call. Check with your system installer or authorized ICON Voice Networks Dealer to make sure your system is programmed for Enhanced 911 Service.

## Call Park

Park a call so that it can be retrieved from another extension.

### Putting a call in Call Park

When speaking on an outside line:

- Press the **[PARK]** key.
- You will hear confirmation tone and the **[PARK]** key will flash green.

If the call is not picked up, it will return to your phone.

### Picking up a call in Call Park

From the extension that parked the call:

- Lift receiver.
- Press flashing **[PARK]** key.

From another extension:

- Lift receiver.
- Press **[PARK PICK-UP]**.
- Dial the extension number where the call is parked to pick-up the call.

## Transfer to Park

You can transfer a call to another user's individual park on their telephone. The call can then be picked up remotely from another telephone. The call can also be picked up from the telephone where it is parked.

### Transferring a call to another user's individual park

When speaking on an outside line:

- Press **[TRAN] + [PARK]**.
- Dial the number of the extension where the call is to be parked, or press the extension key (if assigned).
- When you hear confirmation tone, hang up.
- The **[PARK]** key on the user's phone will be lit.
- If desired, use the paging system to inform the user of the call parked on their telephone.

### Picking up a call parked on your individual park from your telephone

- Lift the receiver (handset).
- Press **[PARK]**.

### Picking up a call parked on your individual park from another telephone

- Lift the receiver (handset).
- Press **[PARK]**.
- Dial the number of the extension where the call is parked, or press the extension key (if assigned).  
*or*
- Lift the receiver (handset).
- Press the **[FEAT]** key and dial **3+4**.
- Dial the number of the extension where the call is parked, or press the extension key (if assigned).  
*or*
- Lift the receiver (handset).
- Press **[PARK PICK-UP]**.
- Dial the number of the extension where the call is parked, or press the extension key (if assigned).

## Save Dialed Number

While speaking on an outside line:

- Press the **[FEAT]** key and dial **2+1**.  
*or*
- Press the **[SAVE DIAL]** key (if assigned).
- You will hear a confirmation tone that indicates the phone number you just dialed has been saved.

### To dial the saved number

- Lift the receiver.
- Press the **[FEAT]** key and dial **2+1**.  
*or*
- Press the **[SAVE DIAL]** key (if assigned).
- The saved number is automatically dialed.

## Last Number Redial

To automatically redial the last number you called:

- Lift the receiver.
- Press the **[SPEED]** key and dial **#**.

# ADVANCED FEATURES

## Call Storage

Your telephone may be programmed to capture, store, and display telephone numbers and IDs from calls received with Caller ID, ANI, or DNIS information.

KEY	KEY MEANING	KEY LABEL
<b>USAS</b>	Retrieve Caller ID for Abandoned or All Calls from Your Station	
<b>USAT/ UST</b>	Retrieve Caller ID for All Calls to Your Station that were Abandoned on a Specific Trunk Group (Flexible) or (Fixed 1-250)	
<b>FLT</b>	Floating Outside Line Group Access	
<b>OPT</b>	Optimized Routing (Make an Outgoing Call using Least Cost Routing)	
<b>COL</b>	Central Office Line Key (Used to Access a Specific Trunk to Make an Outgoing Call)	
<b>UAD</b>	Abandoned Call Delete (Delete Caller ID for Calls that Rang Your Station but Ceased Before You or Voice Mail answered)	

### To view call information:

#### For station:

- Press **[SPKR]**.
- Press the illuminated **[USAS]**, **[USAT]**, or **[UST]** key to display information about the first call.
- Press **#** to scroll forward and **\*** to scroll backward in sequence.

#### For trunk group:

- Press **[SPKR]**.
- Press the illuminated **[UST]** key.  
*or*
- Press the **[USAT]** key + trunk group number to display information about the first call that occurred on a specific trunk group.
- Press **#** to scroll forward and **\*** to scroll backward in sequence.

**To delete a call record from system memory:**

- With a call record displayed, press the [USD] key.

**To make a call by automatically dialing the Caller ID number:**

- Display a call record.
- Press the [USAS] key, [USAT] + *trunk group number*.  
or
- [UST] key a second time.  
or
- Press [FLT], [OPT], or [COL].

**To add digits to the displayed number before dialing out:**

- Dial the additional digits to be added to the outgoing number (the added digits do not appear on the display when entered).
- Press the [USAS] key, [USAT] + *trunk group number*  
or
- [UST] key a second time.  
or
- Press [FLT], [OPT], or [OPT].

**Answering Machine Emulation  
(Voice Mail Monitor)**

Voice mail messages can be monitored as they are recorded. While monitoring the recording, the station user may elect to initiate a conversation with the caller. You may activate or deactivate this feature from your extension.

**To begin Voice Mail Monitor:**

When a call is answered by voice mail at an idle station, you will hear a monitor tone.

- The [Voice Mail Monitor] key red LED will begin to flash.
- Press the [Voice Mail Monitor] key.
- When the [Voice Mail Monitor] key green LED lights, you will hear the caller's message as it is recorded
- Press the [Voice Mail Monitor] key a second time to begin talking to the caller.  
or
- Press [SPKR] or hang up to end voice mail monitoring. The caller's message will be saved to your voice mailbox.

**To activate / deactivate or change the Voice Mail Monitor mode:**

- While your station is idle, press [SPKR].
- Press [FEAT].
- Press the [Voice Mail Monitor] key.
  - Press **1** to deactivate Voice Mail Monitoring.
  - Press **2** to activate manual Voice Mail Monitoring.
  - Press **3** to activate auto Voice Mail Monitoring.

## Busy ICM Callback

When you call another extension and get a busy signal, do not hang up.

- Press the **[FEAT]** key and dial **4+3**.  
*or*
- Press the **[ICM CALLBACK]** key (if assigned).  
Hang up after you hear a confirmation tone.

When the busy extension becomes available, the system will call you back.

- Lift receiver.
- You are automatically connected to the extension.

## Busy Number Callback

When an outside number you have called is busy, you may tell the system to remind you to try again.

- Do not hang up.
- Press the **[FEAT]** key and dial **2+4**.  
*or*
- Press the **[TRUNK CALLBACK]** key (if assigned).
- Dial the desired time you want to be called back.
- Hang up after you hear a confirmation tone.

After the set time, the system will call you back to try again.

- Lift receiver to automatically dial the number.

### To cancel busy number callback:

- Lift the receiver.
- Press the **[FEAT]** key and dial **0+2+4**.  
*or*
- Press the **[TRUNK CALLBACK]** key and \*.
- Hang up after you hear a confirmation tone.

## Call Coverage

Multipurpose keys can be assigned as Call Coverage keys that allow you to answer calls ringing at another extension.

### To answer a call at another extension

When you hear the Call Coverage tone or see the green Call Coverage lamp indication on your phone:

- Lift the receiver.
- Press the **[CALL COVERAGE]** key.
- You will be connected to the call.

### To change the type of indication at your phone:

- Do not lift the receiver.
- Press the **[FEAT]** key.
- Press the desired **[CALL COVERAGE]** key.

The present indication mode will be displayed:

- Dial the number for the desired mode.
- Dial **1** for immediate display and ringing.  
*or*
- Dial **2** for delayed indication (display and ringing starts if call is not answered within a preprogrammed time).  
*or*
- Dial **3** for no ringing (lamp indication only).

## Call Divert (ECS only)

When a call is ringing at your station and your station is idle, off hook, or on a call, you can send that call immediately to your **Call Forward No Answer Destination**.

- Press your **[MBOX]** key.

**Note:** *Call Divert is not supported for ACD Calls.*

## Call Pick-Up

### Internal Group

You may answer calls ringing at extension's in your pick-up group.

When you hear a call ringing at another extension:

- Lift receiver.
- Press **[FEAT]** and dial **3+1**.  
*or*
- Press the **[GROUP CALL PICK-UP]** key (if assigned).
- The incoming call is connected to your extension.

### Direct Extension

You may also answer an incoming call at another extension:

- Lift the receiver.
- Press the **[FEAT]** key and dial **3+3**.  
*or*
- Press the **[DIRECT CALL PICK-UP]** key.
- Dial the number of the extension where the call is ringing.
- The incoming call is connected to your extension.

## Call Recording

You can record a call to voice mail by following the procedures listed below:

**Important:** *Use of this feature may be prohibited by state law.*

### To start recording a call to voice mail

While on an ICM, outside line, or conference call:

- Press the **[RECORD]** key.
- Your call will begin recording to voice mail.

**Note:** *A four-party conference call cannot be recorded.*

### To stop recording a call to voice mail

While recording a call with the **[RECORD]** key lit:

- Press the **[RECORD]** key or hang up.

### To play a recorded call:

- Follow the same procedure for playing a voice mail message.

## Conference Call

The Iwatsu Enterprise-CS allows you to make conference calls with any combination of up to four internal and outside lines on the same call.

### To Make a Conference Call:

While speaking on an internal or outside call:

- Press the Conference [**ADD**] key (The Conference [**ADD**] key LED will flash to indicate that the call is on hold).
- Make your next call (internal or outside call).
- When the party you are calling answers, press the Conference [**ADD**] key again to complete the conference.
- After you hear a tone burst, all parties are connected.

To add another party to the conference, repeat same procedure.

## Do Not Disturb

If you do not wish to be disturbed, you can set your extension to prevent any calls from ringing to or getting through to your extension.

- Do not lift receiver.
- Press the [**HOLD/DND**] key.
- The lamp on the [**HOLD/DND**] key will stay lit.

### To cancel Do Not Disturb

- Do not lift receiver.
- Press the [**HOLD/DND**] key.
- The lamp on the [**HOLD/DND**] key will go out.

**Note:** See [*Hold/Quick Forward*].

## Exclusive Hold On Outside Line

A call on “exclusive” hold may only be picked up from your extension.

### While speaking on an outside call:

- Press the key for the outside line you are already using.
  - The green lamp on that outside line key will flash slowly on your phone.
  - The red lamp will stay lit at other extensions.

### To retrieve a call on Exclusive Hold:

- Press the same outside line key on your phone again to be connected to the call.

## Flash

Flash allows you to receive dial tone on the same outside line that you are using without having to hang up. Flash may also be used to receive intercom dial tone to place another intercom call.

### After you complete a call or if you make a dialing mistake:

- Press [**FLASH**].
- Dial the new number.

### To Use Centrex or PBX features:

- Press [**S FLASH**].
- Dial the new number or feature code.

**If your phone does not have [FLASH] or [S FLASH] buttons:**

- Press [FEAT] then dial 1+1 for Flash.
- Press [FEAT] then dial 1+2 for Short Flash.

**Flexible Call Forwarding**

You can set your phone to forward calls to another extension or to an external telephone number. To forward calls externally, you must first register the external telephone number to a personal speed dial code (90-99). (See the *Speed Dial* feature)

You can also separate Call Forward destinations for ICM calls and CO incoming calls. For example, you could forward all ICM calls to your cellular telephone and all CO calls to your Voice Mail.

**Set Forward Destination:**

- Lift the receiver (handset) or press [SPKR].
- Press [FWD].
- Enter the Call Type you wish to forward:
  - 1 = All calls (CO/Intercom).
  - 2 = CO calls only.
  - 3 = Intercom calls only.

**Enter the Flexible Call Forward Mode:**

- 1 = All calls to another extension or hunt group.
- 2 = Busy/No Answer calls to another extension or hunt group.
- 3 = No Answer calls to another extension or hunt group.
- 4 = All Calls forward to an external number (using Personal Speed Dial Codes 90-99).

**Do one of the following:**

- If you chose Mode 1,2, or 3, enter the extension or hunt group number.
- If you chose Mode 4, enter the Personal Speed Dial Code (90-99).

**Forward Cancel:**

Lift the receiver (handset) .

- Press [FWD].
- Press \*.
- Enter the Call Type number you wish to cancel:
  - 1 = Cancel Forwarding of All calls (CO/Intercom).
  - 2 = Cancel Forwarding of CO calls only.
  - 3 = Cancel Forwarding of Intercom calls only.

**Set Active/Inactive:**

- Press [FWD].
- Enter the Call Type you wish to make Active/Inactive:
  - 1 = All calls (CO/Intercom).
  - 2 = CO calls only.
  - 3 = Intercom calls only.

## Follow Me Forward

### Set Follow Me Destination

- Lift the receiver (handset).
- Press **[FWD]** + **[FWD]**.
- Enter the Call Type you wish to forward:
  - 1 = All calls (CO/Intercom).
  - 2 = CO calls only.
  - 3 = Intercom calls only.
- Enter the extension number of the originating forwarding station.

### Follow Me Cancel

(This feature can only be canceled from the originating forwarded station)

- Lift the receiver (handset).
- Press **[FWD]**.
- Press **\***.
- Enter the Call Type number you wish to cancel:
  - 1 = Cancel Forwarding of All calls (CO/Intercom).
  - 2 = Cancel Forwarding of CO calls only.
  - 3 = Cancel Forwarding of Intercom calls only.

## Hold/Quick Forward Operation

- If programmed for Quick Forward operation, pressing **[HOLD/DND]** will automatically forward all incoming calls to your active forward destination or fixed call forward destination.

## Paging

- Lift the receiver or press the **[SPKR]** key.
- Press the **[PAGE]** key.
- When you hear the confirmation tone, make your announcement by speaking into the receiver.
- Hang up or press the **[SPKR]** key to end the page.

## Whisper Page

You may communicate with a busy station without interrupting their call using the Whisper Page feature.

### To communicate with a busy extension:

- After calling a busy station, press the **\*** key.
- You may now speak to that extension.

### To Respond to Whisper Page

After receiving a whisper page while on a call:

- Press the **\*** key to speak with the extension that called using the whisper page feature.
- Press the **\*** key a second time to resume speaking with the original calling party.

**Note:** *The original calling party cannot hear the whisper page or your response to a whisper page.*

### To Respond to Whisper Page with a Text Message:

After receiving a whisper page while on a call, follow the procedures in *Text Messaging* feature.

## Personal Ring Tones

You may choose one of eight different ring tones to distinguish your station from others.

### To play a ring tone at your system extension:

- With your station idle press **FEAT + # + \* + 1-8**.

### To select a ring tone for your system extension:

- With your station idle press **FEAT + # + \* + 1-8 + #**.

### To restore default ring tone at your system extension:

- With your station idle press **FEAT + # + \* + 0 + #**.

## Speed Dial

### Personal Speed Dial Registration - To register personal speed dial numbers:

- Press the **FEAT** key.
- Press the [**SPEED**] key, then dial the desired Personal Speed Dial Code (90-99).
- Enter the phone number.
- Press **FEAT** to end the operation.

### Personal Speed Dial Registration - To register several speed dial numbers:

- Press the **FEAT** key.
- After entering a phone number, press the [**SPEED**] key.
- Enter another speed dial code number, repeat the same procedure.
- Press the [**FLASH**] key.

### To register a pause time:

- At the desired location, press **HOLD/DND**.
- Dial 1 to 9 for the desired pause time in seconds.

### To set an outside line to be selected for speed dialing:

- Do not lift receiver.
- Press the **FEAT** key.
- Press [**SPEED**] and **#**, then dial the desired Personal Speed Dial Code (90-99).
- Dial the desired outside line group number (01-60 or 00).
- Press [**FEAT**] to end the operation.

## To register a directory name for a speed dial number:

- Do not lift receiver.
- Press the **FEAT** key.
- Press the [**SPEED**] key and \*, then dial the desired Personal Speed Dial Code (90-99).
- Register the letters of the name using the dial pad.
- Press the key until the desired letter is displayed, then press the **HOLD/DND** key to enter that letter or number (up to 10 characters).

1	.,[space],1	2	A,B,C,2	3	D,E,F,3
4	G,H,I,4	5	J,K,L,5	6	M,N,O,6
7	P,Q,R,S,7	8	T,U,V,8	9	W,X,Y,Z,9
*	Alphanumeric	0	&,0	#	Upper/lower case
<b>[FEAT]</b> All delete		<b>[HOLD]</b> Enter/1 character delete			

- Press **FEAT** to end the operation.

## To Speed Dial a Number

When you want to **SPEED DIAL** a registered number, perform one of the following operations:

### Outside Line Pre-Select

- Lift the receiver.
- Press an outside line key.
- Press the [**SPEED**] key, then dial the Speed Dial Code.

The system will automatically dial the registered number.

### Quick Dial

- Lift the receiver.
- Press the [**SPEED**] key, then dial the Speed Dial Code.

The system will automatically dial the registered number. This operation will not work unless you register the outside line group number.

## Alphanumeric Speed Dial By Name Feature

- Press [**SPEED**] [**SPEED**].
- To search for a registered name, press the numbers on the dial pad .
- To focus the search, press **HOLD/DND**, and enter another character.
- To scroll through the registered names, press FORWARD # or BACKWARD \*.
- Press [**SPEED**] to dial the number.

## Text Messaging

You may send a text message to the display of another system extension.

### Busy Bypass/Manual Signaling Text Messages

To select and send a manual signaling text message:

- Lift the receiver and press [**TEXT MSG**] + *text message number (00-99)*, or [**TEXT MSGn**].
- Dial an extension number or press [**DSS**] or [**CCV**].

**To select and send a busy bypass text message:**

While calling a busy or idle extension:

- Press [TEXT MSG] + *text message number (00-99)*, or [TEXT MSGn].

**To respond to a busy bypass text message while on a call:**

While on a call with a busy bypass text message on your display:

- Press [TEXT MSG] + \* + *text message number (00-99)* + [TEXT MSG].

**To delete a busy bypass text message from your display:**

While a text message is on your display:

- Press [TEXT MSG] + # + \*.

**Stored Text Messages****To select and send a stored text message to another system extension:**

While calling a busy or idle extension:

- Press [TEXT MSG] + *text message number (00-99)*, or [TEXT MSGn].
- Press #.

**To display a stored text message:**

- Press [TEXT MSG] + # to display a stored text message.

**To respond to a stored text message by calling the originating extension:**

- Press [TEXT MSG] + # to display the stored text message.
- Press # a second time to call the station that sent the text message.

**To delete a stored text message:**

While your text message key is lit:

- Press [TEXT MSG] + # + \*.

**Scrolling and Selecting Text Messages****To Scroll through the available system text messages:**

- Go off hook and press [TEXT MSG] + \* + *text message number (00-89)*.
- With a message displayed press # to scroll forward and \* to scroll backward.

**To scroll through the available personal text messages:**

- Go off hook and press [TEXT MSG] + \* + *text message number (90-99)*.
- With a message displayed press # to scroll forward and \* to scroll backward.

## Registering Personal Text Messages

To enter a personal text message:

- Press **FEAT** + [TEXT MSG] + *text message number (90-99)*.
- Press the following keys for text message data entry:

1 ..[space],1	2 A,B,C,2	3 D,E,F,3
4 G,H,I,4	5 J,K,L,5	6 M,N,O,6
7 P,Q,R,S,7	8 T,U,V,8	9 W,X,Y,Z,9
* Alphanumeric	0 &,0	# Upper/lower case
[FEAT] All delete	[HOLD] Enter/1 character delete	

- Press [FEAT] to end the operation.

## Making an E-Response Help Call

If programmed, your system provides emergency notification to a group of telephones or paging system.

**Note:** *This feature is in addition to 911 Support.*

- Go off hook and do not dial for more than 10 seconds.  
*or*
- Go off hook and begin dialing a system extension. (Between digits pause for more than 10 seconds)  
*or*
- At ICM dial tone, dial the E-Response Group access number.

The system will initiate an E-Response Help Call to the stations in your E-Response Group and/or a paging system.

## Universal Night Answer

If you need to pick up an incoming call when the system is in the night mode:

- Lift receiver.
- Press **FEAT** key and dial **3+6**.  
*or*
- Press the [UNIVERSAL NIGHT ANSWER] key (if assigned).

You are connected with the incoming call.

## LAYER 2 SWITCH

There are two jacks on the back of your IP telephone. One jack is labeled "PC" and the other is labeled "LAN". Use the PC jack to connect to a second device.

**To use the layer 2 switch:**

- Connect on Category 5 cable from the PC jack on the IP telephone to the NIC card on your PC.
- Connect one Category 5 cable from the LAN jack on the IP telephone to the wall jack connected to the local area network.

# MENU DISPLAY

## IP Telephone Menu Display

The IX-12IPKTD/-E2 and IX-12IPKTD-E IP Telephones are equipped with a Menu Display, three Menu keys, and Up/Down scroll keys.

- The Menu keys control various features made available through the display. Many of the Basic and Advanced Feature codes are accessible through the Menu Display on the IP telephones.
- The Up/Down scroll keys are used to scroll up and down the Menu Display.

### To access a Display Menu feature:

- Select the MENU key on the IX-12IPKTD/-E2 and IX-12IPKTD-E display.
- Use the Up/Down arrow keys on the right side of the display to view the desired feature.
- Follow the on-screen options to execute the feature.

## List Menu

The List Menu is a library of available feature codes. You can scroll through the available documented codes using the arrow keys on the LCD.

### To scroll using the arrow keys:

- Select the List key on the IX-12IPKTD/-E2 and IX-12IPKTD-E display.
- Use the Up/Down arrow keys on the right side of the display to view the desired feature code.

For a full list of Display Menu features, please refer to the **IP Telephone User Guide** in your **Iwatsu Enterprise-CS Owner's Manual**.
